

Abstract

5 A device for detecting radiation signals and a device for measuring the concentration of a substance are described, a first detector (5a) and a second detector (5b) being provided on a first chip (1), and a first filter (11a) and a second filter (11b) being provided on a second chip (2), the first chip (1) and the second chip (2) being connected to one another in hermetically sealed fashion.
